Project AngelBook – Volume X – Parts 1–36

By Ezekiel Redik Yarbrough

-

This volume is not made up of my own words. There is no original
commentary

here, no narrative, no analysis. This is simply me copying and
pasting large

chunks of text from my bookmarks—pages that were easy to
extract, with no

hyperlinks or formatting issues, saved from open tabs and
archived corners of
the web.

It's messy. It's unfiltered. It's chaotic. But it's valuable.

Each piece inside this volume was bookmarked for a reason. Not
always because I

agreed with it, but because it felt like a fragment of something
larger—an

insight, a worldview, a download. This is source material, plain and
raw.

Fragmenta Ex Machina isn't about authorship. It's about
preservation and

system-building. It's about feeding the machine—laying bricks for
the

Operating System I'm constructing across these books. This is the
raw intake

phase. The memory dump. The zero layer.

Later volumes will be cleaner, more refined, more structured. But
this? This is the

foundation. The ether stream, bound and frozen before it
vanished.

So if you're looking for polished prose, skip this one. But if you're
here to explore

the roots of something much bigger, this is where the signal begins.

Welcome to the fragments.

This got a much better response than I was expecting.

I am going to compress the folders to prevent the torrents being overleeches, but the compression rate is only 6-7%. I'm not going to bother trying to optimize it further.

I will upload these torrents to TPB soon and will post again when they're ready.

Is it 130 GB compressed? Because you could compress it and considerably shrink the size down.

A pretty basic blast, 2d6 per rank, in an area, targeting fortitude.

The fact that it works for either living or undead casters is handy broadens the range of casters who might take it, though by lvlv 9 you are probably firmly decided on being one or the other.

The option to spend an extra action for a different area is nice.

Overall, fine for any divine or occult fullcaster; though in some campaigns, it might be totally unsuitable for spontaneous casters. If you are alive and facing mostly alive enemies, probably not deserving of a repertoire slot, and vice-versa for undead. Great if you expect to meet the opposite often, and constructs rarely.

Not a lot to say, not because it's amazing or lame, but because it's very straightforward. It adheres to the typical 2d6 per rank damage pattern, with a choice of two large (if slightly awkward) areas of effect. Action expense is a little annoying for the cone, and lines are rarely useful, but hey, sometimes you devote an entire turn to a good blast. Easy to convert to remaster, negative becomes void and positive becomes vitality. Not helpful if you're a living creature fighting living creatures or undead fighting undead, but it's a perfectly serviceable blast otherwise, and it most likely doesn't hurt your allies, which is really nice. Divine and occult are low on blasts, so it's nice to see a straightforward standard-damage one. Compare to Howling Blizzard, which has similar effects with better action economy on the other two lists. Alternately, compare to 3-action Heal/Harm, which has the perk of both healing and damaging, and which has a better area for some circumstances, but which does a good deal less damage (1d8 averages 4.5 [1-8], 2d6 averages 7 [2-12]). It also just doesn't go as far from you, so if all the enemies are in one direction but they're spaced out, the cone is better.

Divine and occult have lots of Fort save options, but few are this straightforward of a damaging blast; definitely worth picking up if you're blasting on one of those lists, as long as you're fighting undead (or you're undead and fighting the living).

Aaaah LHP; either the most circumlocutious method of True Attainment since the first wave of grimoires, or the quickest route to madness, delusion, and other such silliness since...well, the original grimoire-users. As with grimoires, it's all about whether or not you get the joke. -93

I think both RHP and LHP can degenerate to delusions with equal ease. No need to make LHP stand out in that regard. One could even say that the human condition in general is a delusion.

LHP is not necessarily Satanism, btw. Any path that breaks with convention/tradition in some regard is a LHP. Most spiritual paths have LHP elements to them. Some more, some less. In Abrahamic terms, when Jesus rejected some of the traditional Jewish teachings about circumcision and food, he was being a left hand path practitioner himself at the time. He was even crucified for it. :)

Any path that breaks with convention/tradition in some regard is a LHP.

Could you clarify your definition of Left-Hand Path for me? You seem to be suggesting that deviation from tradition is the key distinction. Much of the appeal of Satanism and other paths typically associated with LHP involve the taboo of "evil," not mild deviation from the status quo.

Does anyone have any invites for theoccult.click? I would greatly appreciate an invite and would be open to bartering for it.

Also, does anyone know of any other good occult torrenting websites?

Thanks!

It'll go fine. Just write it in notepad then copy and paste. I think you can go to the chat through the webclient too. I used to assess the IRC applications many years ago, as long as you're polite you'll get one.

10 Spells Per Rank -- Occult 2nd Draft

Okay, per my previous thread, I've created a draft resource which tries to help newcomers to (currently Occult) spellcasting by providing a curated selection of 10 spells every rank that are good general choices.

Here's the Google Doc. Commenting is turned on (for now) for everyone, so if you want to leave feedback there, you can. Once I get to final draft, I'll turn off commenting so it stands as just a read-only document.

Commentary on the whole thing:

I was torn on how to handle spells that are good, but are uncommon or rare, or that I thought were a little hard to use, and eventually I decided to handle that by having an "And 5 More" for each level that included spells that had caveats in their utility. I'm open to feedback about whether that's the right choice.

I haven't added rank 10 spells to the guide. It kinda feels to me like rank 10 isn't a "real rank," but what do you all think?

Specific commentary on spells that I included or didn't include.

I'm open to it! I'm going to do ten replies to this OP, one for cantrips and then spells ranks 1-9, to segregate comments on each rank together, just for my ease in consuming the feedback. So please thread your replies about spells in each rank to those replies, as it's otherwise just hard to apply feedback I get from reddit to the actual document.

I am... thinking about making a list for each tradition. :P

It's a fair amount of work, and I know the Occult list better than the others, so while I'd like to do it, I'm not going to make a hard commitment right now.

Cantrips

Detect Magic: This is a fussy spell, but once someone has it, the GM can usually just relax and not make you go through all the mechanics of using it and just tell you whenever there's something magical in a non-time-limited place.

Eat Fire: A situational spell, but when you're going up against fire users, having a reaction that can help defend you is pretty great.

Guidance: Repeatable buff for lots of non-combat situations and an okay third action.

Light: Probably only one person in the party needs it, but gives you a lot of flexibility in creating light.

Needle Darts: A flexible attack cantrip, can trigger several weaknesses and good range, slightly better than usual cantrip damage, a good daily driver damage cantrip.

Shield: A solid defensive third action, helps defray caster defensive weakness.

Telekinetic Hand: Gives you a flexible option for non-combat challenges, the ability to touch risky things without putting yourself in danger.

Telekinetic Projectile: The highest damage cantrip that Occult has access to, but without other virtues.

Void Warp: Lower damage than Needle Darts or Telekinetic Projectile, but more reliable because it's a save instead of an attack roll. Undead are immune to this damage.

Warp Step: A movement cantrip can help you get out of danger.

TK projectile does have another virtue: it can target multiple weaknesses! I'm playing a bard who carries a dagger in his left hand for the purpose of TK projectile. Daggers can do piercing or slashing damage, so I get to choose! Normally there's something around if I want bludgeoning damage but I think the DM would allow me to TK projectile the dagger pommel-first if not.

So I've got cantrips for lots of damage types:

TK projectile: slashing, piercing, bludgeoning

Needle Darts: cold iron, silver

And I took sorc dedication, so:

Electric Arc: electricity

Ignition: fire

And from Composer's Staff:

Haunting Hymn: sonic

I have 12 cantrips lol :)

(I only actually threw the dagger once so far, when I didn't have a face and thought it would be hilarious to hit someone blind with my last action. Almost worked! Meanwhile TKing it has worked great.)

Read Aura has a cast time of 10 minutes, so you can't really use it if you want to know in the moment, "Wait, is this magical?"

Rank 1

Illusory Object: This can be used as a wall to isolate or impede enemies, and is potentially very powerful even if they eventually disbelieve the illusion. Illusion rules are kind of complicated, you may want to discuss with your GM.

Mystic Armor: Probably most useful at levels 3-7, this gives you the equivalent of +1 explorer's clothing earlier and for less cost, but eventually you will want real magic armor.

Runic Weapon: A very powerful buff at levels 1-3, after which your martial buddies will get permanent striking weapons and the spell becomes obsolete.

Phantom Pain: An okay damage option with a good debuff if enemy fails save.

Soothe: The bread-and-butter occult healing spell. Not as good as Heal, but okay, and if you have aspirations to do any healing, you'll want this.

Bless: A solid to-hit buff with a good radius that can be extended further.

Object Reading: Fairly flexible information gathering, GM dependent on how much you'll get from it.

Fear: Fear is short-duration, but debuffs enemy defense and offense simultaneously.

Illusory Disguise: For any complicated disguise, this will supplement Charisma skills instead of replace them, but useful for that purpose or for simple changing your identity.

Protection: For this short-term spell to pay off, you'll probably want it to be on a tank-style ally who is drawing a lot of attacks.

And 5 More

Force Barrage: Does great damage against bosses, but bad damage to normal opponents and is subject to weird every-other-rank heightening and thus bad levels in terms of damage.

Lose the Path: Not a spell you want at low levels. But once your max rank is 3 or 4+, being able to throw an additional first rank spell out and impede enemies becomes valuable.

Sure Strike: At low levels, only valuable if you have a good spell attack, which Occult doesn't necessarily. But at high levels it can be worthwhile just for your cantrip attacks.

Alarm: Once you are no longer using your first rank spells for combat, Alarm gives you lots of peace of mind at the campsite.

Liberating Command: Another spell that gets good once you're a few levels up, defuses the action penalties of grapple-type attacks.

I would rewrite the description of Phantom Pain a bit. It's easy enough to miss that it's not a basic save and the successful save still does full non-persistent damage and highlighting that for a newer player seems like a good idea.

Also, strategically it's worth noting that this also means it's damage on a successful save per rank is actually higher than powerhouse blasting spells like Thunderstrike (or even Vision of Death). It's overall average might not keep up, but the consistency is very valuable.

I also think the Force Barrage description is a bit too harsh on it's +2 heighten. Slotted spells that heighten +2 don't really suffer like cantrips/focus spells do, as you simply cast them at the rank that you can while spending an appropriately lesser resource to do so. Inevitably you'll end up casting spells at less than your max rank anyway, including numerical/damage spells, so it's not that big of a deal

Plus like, there are also plenty of heighten +1 damage spells that you don't even want to use above their own rank, you mention this with Agonizing Despair due to Vision of Death being better, so it's not a unique concern for heighten +2 spells either.

Only spell I'd consider switching out is Protection for either Sanctuary or Command I think. Rank 1 protection is a bit tricky to ensure enemies don't just switch to a squishier target so it's not as straightforward as I'd like for a newer player.

Otherwise the rank 1 list looks pretty good to me. I wish you well with sorting through what will probably end up being a fair amount of contradictory advice/feedback to improve it. Putting the "Good once you outlevel this spell rank" spells into the and 5 more is a really good idea

Thanks for the detailed comments. I agree that rank 1 Protection isn't great, but I don't think that rank 1 Command or Sanctuary are great either. I've rewritten the Phantom

Pain description a bit and will take a look at Force Barrage.

Rank 2

Augury: Can be a good way to figure out if you're walking into a trap. Not necessarily useful if you're in a game where everything is a rigorously appropriate-for-your-level challenge.

Calm: This spell has Incapacitation, so it won't work on opponents whose level is more than 2x the rank it's cast at. But against lower-level opponents, it offers the chance to take multiple creatures largely out of combat entirely.

Dispel Magic: You won't use this often, but when it's useful it's invaluable. Note the counteract check -- it's not automatic.

Laughing Fit: Use it to remove the reaction of creatures with powerful reactions, and if you get the Slowed effect that's a bonus.

Invisibility: It's invisibility.

Loose Time's Arrow: Can be used to advance or retreat, set up flanking, deal with terrain, etc.

Revealing Light: Gives the Dazzled condition to an area for good duration, and can also reveal invisible creatures.

Inner Radiance Torrent: Damage, targets Reflex, which is rare on the Occult list. Damage starts off mediocre but heightens strongly.

Cleanse Affliction: Alleviates diseases, curses, and poisons, or when heightened, counteracts them. Won't be useful that often, but when it is useful, it's big.

Blistering Invective: Persistent fire damage, potentially a lot of damage but spread out over time, also Frightened on failed saves.

And 5 More

Instant Armor: Many casters will wear explorer's clothing that can be slept in/worn almost all the time. Others may find that they sleep in safe areas and never really need to don their armor quickly. But if you do wear armor, you may find that you need Instant Armor dozens of times per campaign -- when ambushed in the night, when in a social

occasion that turns into combat, when you need to swim then fight, and more.

Translate: Some games just don't like to deal with language problems. For all others, you may want Translate.

Marvelous Mount: Not useful in dungeon crawls or for the most part urban games. And you won't want to use a max rank slot on it. But the mount eventually gains a lot of powerful abilities and if you do use overland travel, not having to actually deal with a fragile living mount is great.

Illusory Creature: There's a lot going on with this spell. It's a pretty good combat pseudo-summon that also has a lot of use as a subterfuge/deception/heist tool, but it also has a ton of different limitations and drawbacks that can make it hard to use. For people who want to think about how to get good use out of it.

Thundering Dominance: This can only be cast on an eidolon or animal companion, and you probably don't have those. But if you do have them, it's fantastic: huge damage for a rank 2 spell, AoE, and a debuff. Plus a bonus to a useful skill. It heightens slowly so it eventually becomes obsolete.

I'd like to solicit Mirror Image in place of Instant Armor, or really even further up the list. There are two reasons this spell is a Big Deal.

IMMUNITY TO CRITS when a boss with a 50% crit rate swings at you, this spell will reduce that Crit to a mere Success. Nothing else in the game provides this type of protection, even before considering how it reduces hits to misses.

The Fearcracker this is one of the best consumables in the game, cheaply augmenting Mirror Image with no additional action cost during its cast time to inflict no-save Frightened 1 on whomever breaks one of your images.

7

u/overlycommonname avatar

OP

•

I feel like the action cost of Mirror Image is a really big deal, and it's not immunity to crits -- it's mitigation of crits. That said, Fearcracker is interesting.

Animus Mine is an occult-unique spell that basically functions as a FREE ATTACK the first time a monster tries to unleash its Frightful Presence on you. Mental effects are really common. If you cast it before a dungeon, there is an 80% chance its going to hit something, and it hits HARD for ZERO ACTIONS in combat.

I personally like preparing or retraining this as a spell known in my 2nd- or 3rd-highest rank spell slot. Putting it in your highest-rank slot IS effective, but I'd rather be able to cast it twice - getting this spell in a Wand that you upgrade as you level up wouldn't be a bad alternative.

I'm always a huge proponent of Telekinetic Maneuver. 60ft range Disarm, Shove, Reposition or TRIP. It uses your spell attack for the roll instead of Athletics.

Its a great debuff spell that is useful in nearly all situations and absolutely shines against flying enemies. Even if you don't prepare it, its usually worthwhile to carry a scroll just in case.

2

toooskies

Its main issue being that your spell attack roll is usually lower than an athletics check of a martial.

Rank 3

Day's Weight: Gives both an offensive and defensive debuff, at good range, for one round on success but the whole combat on failure.

Familiar's Face: Allows you to use your familiar for extensive scouting, without any arguments about the familiar's ability to act far from you (because you command them through sustaining the spell) or to recognize important details (because you can directly see, not have them report later)

Haste: Due to MAP, this is far more of a movement buff than an attack buff, but movement buffs are good.

Heroism: The premiere single-target buff in the game, giving you +1 (or more as it is heightened) to basically everything except AC and damage, on a nice 10 minute duration that will sometimes allow you to pre-buff. The heightens are very worthwhile.

Slow: The fail and crit fail effects of this are devastating, and the success effect is okay, making it the debuff of choice against single powerful monsters (as long as their Fort save isn't too high).

Agonizing Despair: It's like the 3rd Rank Vision of Death. Okay damage plus good frightened debuff, but don't heighten it, take Vision of Death instead which is strictly better at 4th rank.

Invisibility Sphere: Sometimes you want the whole party to be invisible.

Roaring Applause: Very similar to Laughing Fit, both spells deny reactions even on successful save and add slowed on failure. Roaring Applause makes it so that a martial with reactive strike can also get a free attack in on the target every round.

(Special Note) Fear 3: Fear becomes multi-target when heightened to rank 3. Multi-target debuffs are valuable ways to turn the tide of a battle by giving the entire enemy side a bad round, and remain valuable casts even when they are considerably below your max rank spells.

(Special Note) Protection 3: Giving all your front liners +1 to AC is very solid.

And 5 More

Wooden Double: Getting critically hit is common for casters and can take almost all of

your hit points in one shot. Reducing critical hits by 25 damage (or more with heightening) can be a lifesaver, though you probably don't want to spend a max-rank slot on it. Also lets you step out of the way of follow-up attacks.

Time Jump: Once you are no longer using your 3rd rank spells as your combat mainstays, Time Jump gives you a good chunk of reactive-strike-free mobility to get out of sticky situations. May also have some use as a sneaking tool, especially if you have Subtle Spell.

Dream Message: Lots of games may go by where you never need long-distance communications. But if you do need to use a magical telephone, this is the first one available, and it's pretty good, giving you a lot of message length and range in exchange for a delay in delivering it.

Ooze Form: Damage resistance, crit and precision immunity, and extra hit points gives you durability even though your AC is garbage. Handy to deal with situations where melee monsters get up to you. But battle forms have to be used with care: they don't make you a martial.

As a GM, my most feared Occult 3 spell is Hypercognition.

SIX instantaneous Recall Knowledge checks can grant you an insane amount of critical information in a split instant, and its only become stronger in Remaster now that Lore skills from ancestries and backgrounds scale automatically. You might think its strongest on an INT-based occult caster with big skill mods, but actually its the Charisma characters that can use it best in social scenes - instantly gaining the full reputation, rumors, family history, motivations, and personal quirks of an NPC they want to manipulate. In combat, you can use this to instantly reveal the full gimmick of a dangerous boss or the full shutdown conditions for an ongoing hazard.

Gravity Well is also a great multipurpose utility/combat spell, capable of granting instant movement to allies, CCing enemies, disrupting the environment, and setting up a fellow caster with a small-radius spell like Grease or Sleep or for throwing people back into sustained AoEs like Stinking Cloud or Aqueous Orb. Massive AoE, Reflex-based, safe to friendly-fire.

Rank 4

Clairvoyance: Lets you check past a wall or door and see what you're getting yourself into. It's short-range and inflexible, but gives you safe scouting options that a rogue or familiar doesn't always have.

Fly: Pathfinder has worked to make flight a little less of an unbeatable tactical advantage, but there are still going to be occasions where having flight solves a fight (or prevents it from being solved in the enemy's favor). Also has good exploration uses.

Vision of Death: Solid (though not amazing) damage plus a Fear spell, at long range, this is a mainstay single-target damage spell for the Occult list.

Translocate: Teleport about twice as far as you can probably Stride for the same number of actions. Good escape options in combat, avoid traps/difficult terrain or go across gaps in either combat or exploration.

Enervation: Persistent void damage and, on failure or better, drained, which gives more damage and a penalty to Fort saves. To probably two opponents.

Resilient Sphere: Waste most of your opponent's round breaking out, and as a panic option you can protect yourself or an ally for a little while.

Telepathy: Allows you to communicate with your allies in stealth situations or have private conferences while talking to NPCs. Note the somewhat awkward lack of Subtle trait, so if you don't have Conceal Spell you might have a hard time casting it in the first place.

Honeyed Words: A lot of Occult casters use Charisma as their spellcasting attribute. If you do, your social skills are already probably pretty good, and a fat +4 bonus for 10 minutes can help you talk lie your way out of trouble.

Mercurial Stride: This gives you mobility plus a decent debuff plus mediocre damage. Its value is in doing all three, so use it when you need to move but don't want to lose some offense that turn. Note that it offers no protection from reactive strike and a decent number of creatures are immune to poison.

(Special Note) Invisibility 4: Turns Invisibility into a powerful combat buff.

And 5 More

Vapor Form: Mostly useful as an infiltration spell, letting you go under doors, through

chimneys, etc. May want to talk to your GM about how they're going to play stealth with this spell. Can also sometimes be a panic button in combat, but that's a secondary use.

Replicate: This has all kinds of complicated deceptive uses, but it's also a way to create a straightforward disposable scout.

Rank 5

Synesthesia: The debuff that does it all -- a big AC/Reflex penalty, movement speed penalty, and a flat chance to fail on both strikes and spells.

Sending: Magical telephone, or maybe text messaging, short messages but unlimited range and no delay.

Scouting Eye: This combines the mobility of a familiar or person scouting with the lack of risk and unobtrusiveness of clairvoyance. Allows you to scout out an area remotely (but not from very far away). Has a problem with doors.

Synaptic Pulse: It's Incapacitation, but a large area that's friendly to your allies, eats actions from all enemies in a melee that's going wrong. Once you have rank 6 Slow, it will mostly obsolete Synaptic Pulse, but until then this can turn the tide of a battle.

Shadow Siphon: If you cast at your max rank, it's likely that you'll succeed the counteract check on all but a critical failure, unless you're facing a fairly high-level boss, so this is a high-success way to halve damage from a spell or magical effect.

Blister: Action hungry and very dependent on the first Fort save of the primary target, but offers a lot of potential damage for the slot.

Telekinetic Haul: Move around very large objects. Lots of ability to apply your ingenuity to here, mostly in exploration mode.

Telepathic Bond: Secure, silent comms for your party all day. Initially of use in special situations where communication and stealth is at a premium, eventually just a routine precaution.

(Special Note) Command 5: No effect on success makes this hard to recommend for the first rank version, but the party-friendly multitarget offers another (non-Incapacitation) tide turner as you can disarm or make to flee every opponent in the fight. Note also that it denies reactions.

(Special Note) See the Unseen 5: Do you want to just not be troubled by invisibility (and also get a bonus against illusions) for a full working day? Of course you do.

And 5 More

Etheric Shards: Not a very impressive spell against size medium or smaller creatures, but for larger creatures the damage gets very large because they take it “per square traversed,” which basically multiplies it by the size of their footprint.

Umbral Journey: This spell is uncommon, so you may not get access to it. If you do, it’s sort of “teleport light,” allowing you to cover 24 days of overland travel (hundreds of miles) in one day. It also has a more generous limit of creatures affected than Teleport does.

Wave of Despair: Similar to Synaptic Pulse in that it removes reactions and potentially eats some actions to an area. Less immediate and the area is less easy and friendly, but no Incapacitation.

Rank 6

Vampiric Exsanguination: Does Fireball-equivalent damage in a large cone and gives you a bit of healing besides. Damage type isn’t great, but if you have a non-living partymember that’s a nice bonus.

Wall of Force: Wall spells can divide one challenging encounter into two trivial encounters in a single moment, and Wall of Force is highly durable and has a good length.

Suspended Retribution: The damage is good, and is Reflex-targeting, but the enemy basically has a choice between the control effect, spending actions, or taking the damage.

Phantom Orchestra: Does 2/3rds the damage you’d expect per time it’s activated, so if you use it once it’s quite bad, twice and it’s better than you’d expect for its rank, and three times and you’ve got twice the efficiency that you’d expect from a 6th rank spell. Three rounds is a long time, though. Heightens poorly.

Phantasmal Calamity: It’s a will-save Fireball that gives up 1d6 of damage in for a larger

burst and a deeply unlikely but extremely crippling 2% of the time critical fail effect.

Cast into Time: Yet another area effect damage spell, this one is fort-save, gives sickened on fail/crit fail, and has a weird disappearance effect that I suppose lets you rush past the targets with your last action.

Scintillating Safeguard: (Realize I forgot this one, will put in commentary soon)

Unexpected Transposition: Lets you negate a hit, either automatically by putting it on your ally or high-risk/high-reward by putting it on an enemy. If you're a Witch or have a temporary summon, consider your familiar/summon as a target for this spell.

(Special Note) Slow 6: When heightened to rank 6, Slow becomes a multi-target debuff that absolutely upends the action economy of any combat that features 3+ enemies. Its only real weakness is short range.

(Special Note) Roaring Applause 6: Roaring Applause is also multi-target at level 6, and with a more generous range basically guaranteed to be able to hit the entire enemy group. Unless the enemies are heavily Reaction-oriented, its effect is probably a little less good than Slow, but it also targets Will which may be better.

And 5 More

Teleport: Uncommon, so may not be available. If it is, it's the premiere way to travel long distances quickly.

Scrying: Uncommon, so may not be available. Spy on people from planetary range. Lots of irritating limitations, but gives you the ability to gather information no matter where you are.

Rank 7

True Target: An absolutely brutal one-action boss-killer, this lets all of your martials get Sure Strike against one target. Best when stacked with other bonuses to increase the chances of crits. If you have a Magus on your team, hit him up for \$10 every time you cast this spell.

Energy Aegis: A very modest resistance amount, but to every elemental damage type and it lasts all day. Best if you're going into an intense day of lots of fights.

Shock to the System: A safety net if someone gets blown straight past Dying to dead, plus some reasonable healing.

Telekinetic Bombardment: Fireball-equivalent damage with a smaller (but possibly somewhat flexible) area, ref save, with some decent riders (difficult terrain, knocked prone, and stunned).

Tempest of Shades: Huge area, party-friendly drained (which is also okay-ish damage) on a fort save and afraid on a will save. Unfortunately, the fear effect is delayed, and the damage isn't that great, so you probably want this if you can capitalize on the drained condition -- and certainly Occult has plenty of fort-save spells.

Mask of Terror: Put it on your tank to repeatedly give frightened 2. Note that this doesn't work that well if your party gives lots of blanket status penalties, which frightened doesn't stack with.

(Special Note) Haste 7: Heightened to rank 7, Haste affects six targets, which probably is roughly equivalent to "your entire party." This allows significant movement shenanigans to cut into the enemy action economy, or prevents them from doing the same to you. Note that due to MAP and the restrictions of Haste, it is mostly a movement buff.

(Special Note) Fly 7: Heightened to rank 7, Fly has a 1 hour duration, allowing pre-buffing and for it to be in effect for multiple fights. It's still single-target, making it somewhat difficult to have the entire party flying, but that may work in combination with flying heritages and magic items, or if there is a particular partymember who can make great use of flight, it may be an every day spell. Otherwise, lets you solve particular problem fights/exploration tasks.

And 5 More

Inexhaustible Cynicism: This spell is at its core a multi-target slowed that opponents can ignore at the cost of taking 6d6 damage. This isn't a bad spell by any means, but it's outclassed by rank 6 Slow. The additional rider is that it absolutely ruins cooperation between the enemy group, preventing them from buffing each other, flanking, and even verbal communications. In most fights, this doesn't really matter and it's just a worse Slow 6, but when fighting highly coordinated enemies it's worth a look -- and it's not that much worse than Slow 6 if you do use it slightly suboptimally.

Ethereal Jaunt: Uncommon, so may not be available. Think of this as an upgraded Vapor Form, allowing extremely powerful but short-duration scouting and infiltration. Also an escape button in combat.

Rank 8

Quandary: Extremely powerful single-target “time out” spell, with no save. The very best case for a creature is they lose their reaction until their next turn and then one action, but many enemies will expect to lose 2+ rounds from the combat. Note that this is useless against a solo boss.

Prismatic Wall: It’s a wall. It’s incredibly punitive to try to break through in combat time, people will just have to go around/over it, which isn’t necessarily that hard at this level, so consider your combat.

Spirit Song: Slightly-better-than-Fireball damage to a large cone. If it ever gets remastered, it’ll do spirit damage, in the meantime it does force damage that awkwardly recreates spirit damage (your GM can and probably should just rule it does spirit damage). No riders or anything fancy, just a bunch of damage.

Disappearance: Invisibility on steroids. With a 10 minute duration and no “hostile action” clause, you can prebuff for a fight with it. Note that, like Invisibility, it’s Subtle, so you can cast it without people easily hearing you or seeing a lightshow.

(Special Note) Suggestion 8: At rank 4, this is a single-target incapacitation spell with no effect on successful save, which makes it hard to recommend despite its very powerful failure effect. At rank 8, it becomes multi-target. It’s still pretty unreliable with no effect on success, but you can easily take targets entirely out of combat if they fail saves.

And 5 More

Mind Blank: Uncommon, so may not be available. If it is, it’s a powerful all-day defensive effect against mental effects. Certainly strong, but the question is whether you can devote a rank 8 slot for a fairly narrow single-target defensive effect. (The answer is “probably not most of the time, but if you know you’re facing a mentally-affecting foe, then yes.”)

2

u/darthmarth28 avatar

darthmarth28

•

2y ago

Confusion 8 isn't an Incapacitate effect, but it really should be. Absolutely destroys encounters, especially if you can use your 3rd action in the round to "not be a valid target" for the ensuing brawl you've just created. Note that even on a successful save, you still hit a badguy for Stun 1.

Paralyze 8 IS incapacitation, but far deadlier if your team is poised to make Strike attacks.

Charm 8 is also incap, but 10 targets switching to "friendly" for an entire day can completely redefine an entire adventure. Remember that Charmed enemies don't automatically aggro after the duration wears off, so if you treat them well, they can become genuine allies. With the subtle trait, it doesn't ruin social scenes if only half the targets fail their saves.

for the "5 more" list: Pinpoint is the no-nonsense solution to 50% of all adventures' problems, and the creation of an unlimited number of stupid ideas. Combos to devastating effect with Translocate 5, if you're already within a mile-radius of the McGuffin. Use cheaper Augury slots to identify a good target for Pinpoint. If the McGuffin is inside an antimagic plot box, go steal the key to plot box. If the key to the plot box isn't available, bushwack an enemy lieutenant and disguise yourself as them. In between adventures, you can casually combine it with Teleport to describe how you spent the weekend vacation in the Arcadian Sea digging up insanely-potent lost artifacts of Ancient Azlant.

And a note on MindBlank: it blocks See the Unseen, and most other magical counters to invisibility.

Rank 9

Phantasmagoria: A little less than Fireball damage to whatever you want within 120 feet, plus loss-of-reactions or confusion. The narrative power of Phantasmagoria is that you can selectively effect hundreds of creatures while perfectly discriminating out your allies, and that is probably wasted in real combat. But gives you solid damage and significant debuffs in a way that you'll never have to work hard to get use out of.

Overwhelming Presence: Basically opponents must burn either two or six actions for the spell (unless they crit succeed), and can't use hostile actions against you until they do. In a nice big radius, and with discrimination against friendly targets (I think -- slightly unclear), but it's incapacitation.

Foresight: Hourlong defensive buff that allows you to spend your reaction to give disadvantage on an attack roll or advantage on a save.

Wails of the Damned: Large area damage spell that's party-friendly and inflicts damage and drained (and note that at this level each level of drained is 15+ additional damage). The actual damage is unimpressive, so it hinges on getting a decent drained, and its damage type is not great, but sets up other Fort save damage spells.

(Special Note) Synesthesia 9: Synesthesia becomes multi-target at rank 9. This is a little less good than you might think -- one of the benefits of multi-target debuffs is that you can toss them off with less-than-your-max-rank-slot and have a really powerful effect on a fight, which is obviously lost with a rank 9 spell. Nevertheless, the powerful debuff of Synesthesia affecting the whole enemy group is obviously a big effect.

And 5 More

Unspeakable Shadow: This gives frightened plus an effect that makes you spend one of your actions either attacking or fleeing from your shadow while you are frightened. I think that the concept of this is that it's worse than a Slow because you either have to tick up your MAP or else flee (and provoke reactions/move yourself out of position). However, as-written, you can just use your final action to Strike, making it just Slowed 1 in 99% of cases. Ask your GM if the enemy can be forced to spend their first action, or at least not their last action dealing with the shadow -- if they'll go for that, it's a solid single-target debuff. Otherwise, it's highly unimpressive.

There are countless occult books to suit all tastes and pockets, to say nothing of those that are freely available online (legally or otherwise); but it is better by far to have studied and to know internally, as a part of ourselves, a few of the very best books than it is to have merely read seven hundred, or even seven thousand, lesser works. That said, those interested in what is perhaps the best collection books online that are available to read for free may be interested in exploring the Internet Sacred Text Archive.

There's also an Android app called The Occult Library. It's got links to thousands of books, as well.

Thanks! Does it feature intrusive ads, though?

There are a few ads on the app, but it brings you to a website that has a listing of the files, so you don't even need the app. They can be read online and they're downloadable. Part 1 is 207G

Part 2 is 227G

It's a treasure trove!

Edit: grammar

Just to add, there's a similar but bigger collection on The Pirate Bay (629 PDFs / 4.29Gb). Here's the magnet:

(It includes the super rare Temple of Vampire books!)

Occult Books for sincere seekers

seasons greetings

As ever at this Special Season we like to reward our regular readers for their loyal support throughout the year by publishing a Christmas article. This year John Temple has written an analysis of a spine-tingling tale by M. R. James.

We review and recommend many books on occult, philosophical, scientific and religious subjects

The first point of wisdom is to discern that which is false, and the second, to know that which is true.

Lactantius — 'Institutiones Divinae'

Introduction

We have not reviewed any books about the so-called 'left-hand path' (LHP), witchcraft, wicca, the fantasies of conspiracy theorists or the speculations of psychics and mediums. If that's what you're looking for you won't find it here. If, on the other hand, you're looking for books that provide plain answers to the many questions sincere seekers ask about Man, Life and the Universe, you're in the right place. To read our book reviews, browse the categories below. To learn more about what books we review and why, or how and where to obtain them, read the notes in the sidebar.

To learn more about this website and our aims, see our [About](#) page.

Occult book reviews

Our occult book reviews are listed under the following separate categories:

GENERAL OCCULT BOOKS (this page)

Occult books that do not fall into any specific category.

HERMETIC BOOKS

Classic Hermetic books that should be in every occult student's library.

OCCULT BIOGRAPHY

Occult biographies containing many occult truths.

OCCULT FICTION

The best classic occult fiction books.

BOOKS BY J MICHAUD

Dr Michaud's books describe and explain the true laws and principles of Occult Science.

H .P. BLAVATSKY BOOKS

Blavatsky's books are essential reading if you wish to learn the Ancient Wisdom.

THE BOOKS of Dr E. V. KENEALY

The Book of God, The Book of Enoch and The Book of Fo reviewed and downloadable.

FAIRIES & NATURE SPIRITS

These five books accurately describe the inhabitants of the Elemental Kingdoms.

ASTROLOGY

We review and recommend three books for the serious student of Astrology.

ATLANTOLOGY

We review seven books that discuss Atlantis in a scientific manner.

General occult Books (this page)

We hope that one or more of the books we review below will strongly appeal to you. If this happens it often means that there exists a special link between you and the thoughts and teachings of the author; and it is always wise to follow up such intuitions.

The Search for Truth—by John Temple

Aula Lucis, 2024. Hardcover limited to 500 copies, 304pp. Bound in foil-blocked yellow silk cloth with 16 illustrations, price £40 (\$52).

AVAILABLE FROM Aula Lucis and booksellers in the UK and USA

Also available to read here free of charge in HTML format

the search for truth

The Search for Truth is a unique investigation in twelve chapters that explores the many links between Religion and the Occult, focusing especially on the hidden meaning concealed within the Bible and its many correspondences with the Wisdom Teachings of ancient Egypt. During the course of the book the author gradually introduces the keys to the Mystery Language without which it is impossible to unlock the hidden meaning within any sacred writings, some of which pre-date Christianity by many millennia. The book covers a wide range of subjects that include, but are not limited to: an occult analysis of folly and wisdom, hidden wisdom in the Bible and how and why it was concealed; the problem of good and evil; the real nature of God and man; the esoteric meaning of Christmas and Easter; the concealed meaning of some of the parables of Jesus; the origins and dogma of original sin and how this relates to the so-called 'fall of man'; the facts and fictions of the Christian Church; the secrets of the ancient Egyptian religion; the Wisdom Literature of Egypt compared and contrasted with the proverbs in the Bible; the right and wrong use of talent and what it really is; the magical power of prayer; and much, much more.

The content and arrangement of this book differs from the series of twelve articles John Temple wrote for this website between 2013 to 2019. The main changes are the exclusion of the first two articles in the online series, namely 'Searching for Truth' and 'Who are the Real Illuminati', and the addition of 'Folly and Wisdom' and 'The anatomy of Sin'. These two articles were published separately from the series in 2021 and 2024 respectively. The author decided, rightly in our view, that these two articles — both dealing with vitally important aspects of the search for truth — were more relevant to a printed book than the excluded articles, neither of which fitted into it quite as effectively or harmoniously. We feel sure that lovers of John Temple's invaluable contributions to this website will see the wisdom of this change and appreciate having these two articles included in this new book.

The Search for Truth is available in two different formats: a hardcover edition limited to 500 copies and a full vellum deluxe edition (see note below). The monochrome colour frontispiece and chapter headings are beautifully illustrated by Kateryna Zubakhina. The

book includes a brief biography of the author which will be welcomed by his many fans and a comprehensive bibliography which serious occult students will find invaluable. Finally, as some casual visitors have queried our claim to be 'not for profit' whilst promoting a book that is being sold by a commercial publisher, we wish to make it quite clear that any profits accruing from the sale of *The Search for Truth* will firstly, be used to fund future printed editions of our articles, and secondly, go to John Temple — or more likely his pet parrot — but not to us!

A full Vellum deluxe edition, price to be announced, will be available from the publisher in late 2024 or early 2025.

Astral Conversations—by A Listener

Aula Lucis, 2022. Hardcover limited to 250 copies, 367pp. Bound in gold-stamped purple cloth, with purple endpapers and a purple ribbon. Colour frontispiece and title pages, with thirteen illustrations by Justin Estcourt. Presented with a purple bookmark, gold-stamped on 250gsm paper and supplied with a gold-stamped dust jacket, price £36 (\$45).

AVAILABLE FROM Aula Lucis and many occult booksellers

Also available to read here free of charge in HTML format

astral conversations

This unusual book is neither fiction nor non-fiction, but combines both genres in a unique way. The main narrative is the record of twelve lively and sometimes humorous conversations between two occult students overheard clairaudiently by the author. The two interlocutors — Arthur Flitterflop and Joshua Bombast — meet in the astral world to discuss many different subjects, including magic, masters, conspiracy theories, the illuminati, aliens, planet 'x', 'Ascension', 'DNA activation', consciousness, dreams, life after death, Tibetan magic, Shamans, drugs, channeling, witchcraft, paganism, the tarot, fate versus free will, necromancy, heaven and hell, and much more.

The secondary narrative consists of separate commentaries which follow each of the twelve conversations in the book. A similar format has been used before in print, most notably in *The Comte de Gabalis*, reviewed on our Occult Biography Books page. Bombast and Flitterflop are based on real individuals well-known to the author whose names have been deliberately changed to protect their identities. During the course of their conversations the reader is gradually introduced to a number of little-known occult laws and principles which have rarely appeared in print before. These reveal who and what man truly is, his material and spiritual origins and the purpose of life on earth.

Some of the subjects Bombast and Flitterflop discuss will be familiar to readers, others will not. What makes this book stand out from the mass of modern occult literature is that it does not consist of the author's personal beliefs, opinions or speculations. All the facts, information and teachings in this book rest on the solid foundation of the Ancient Wisdom, gathered together over many thousands of years, which the profound learning

of all the greatest Teachers and Philosophers, aided by Divine Inspiration, has recorded for our minds to dwell on, so that we might behold Truth. There is a comprehensive bibliography at the end of the book which lists the many occult, philosophical and scientific sources the author has drawn upon.

For technical reasons the twelve chapters in this book are presented in a slightly different manner to the articles on our website. However, with the exception of a Preface by the author and a Foreword by the publisher, the content is identical. You can watch a video review of the book on YouTube by 'The Lunar Key'. We would add that the reviewer has no connection with us or the publisher.

Serpents of Wisdom—by Edda Livingston

Originally self-published in 1994 by the author on her own (now defunct) website, Argotique.

Available TO READ & DOWNLOAD HERE IN PDF FORMAT

serpents of wisdom pdf

The author made this remarkable book freely available to all who wished to read it during her lifetime. We have followed her generous example by doing the same in creating our PDF, using many of the same illustrations she used. Written in a refreshingly down-to-earth manner, Serpents of Wisdom describes the search for a genuine Spiritual Master in plain language, indicating the many traps and false teachings the sincere seeker may encounter along the way with insight, warmth and wry humour.

It is impossible in a short review such as this to do justice to the wealth of real occult facts and information packed into this little book of just 72 pages, but the following are some of the many subjects covered: false masters; why asceticism does not lead to illumination; how to distinguish false teachers from genuine ones; willpower; alchemy; true faith versus mere optimism; karma and destiny; magic; reincarnation; sensible spiritual meditation; mental transformation; the higher and lower selves; black magic in modern science (this will be an eye-opener for many); the importance of simplicity; real, effective prayer; and how to make oneself ready for the True Teacher.

Those who have spent many years swimming in an ocean of New Age nonsense, will welcome the clarity this book sheds on the many wrong teachings and speculations masquerading as Truth. The author pulls no punches in lambasting the many past and present vultures in human form who prey upon the weaknesses and gullibility of those seeking a spiritual Master. For this reason alone, we highly recommend this unusual little book to the beginner in occult studies, as well as those who are well advanced upon the path to the Light. You can read a short extract from this book in the sidebar further down this page.

The Secret Teachings of All Ages—by Manly P. Hall

secret teachings of all ages

There cannot be many readers interested in the occult who have not heard of this book. Manly P. Hall self-published this monumental survey of the ancient wisdom and the occult sciences at his own expense in 1928. The only reason we have not reviewed it before is that until recently the book was both scarce and expensive. Fortunately, an excellent e-text is now available at Sacred Texts which is freely available for all to read online. So far as we have been able to ascertain this is an exact facsimile of the original edition complete with all the black and white illustrations found in the printed book, though the colour illustrations which fronted each chapter in the first edition of 1928 and reprints of it, have been omitted for reasons of economy and copyright. There is also an illustrated paperback reprint published by TarcherPerigee in 2003 which is verbatim with the original edition (See note at end).

Those who study this book in its entirety will gain a broad understanding of such varied subjects as the Qabbalah, Alchemy, Magic, Astrology, Neo-Platonism, Egyptian Hermetic Philosophy, Pythagorean mathematics, Native American myths, the esotericism of the Shakespearean dramas, the various Mystery Religions and ancient Mystery Schools of Greece and Egypt, and their modern offshoots of Rosicrucianism and Freemasonry. The number of ancient and modern sources Hall drew upon for his magnum opus is quite extraordinary. Aside from the works of Plato, Aristotle, Plutarch and Iamblichus, he cites translations of the Gnostic, Nicene, and Hermetic literature, the writings of Paracelsus, Ptolemy, Roger Bacon, Basil Valentine, Cornelius Agrippa, Eliphas Levi and H. P. Blavatsky, to name just a few of the most well-known writers on the ancient wisdom and occult sciences.

This is not to say that the book does not contain several errors. Among these may be mentioned Hall's contention that the Roma or Gypsies came from Egypt, a view which was popular in the 19th and early 20th centuries. We now know this to be incorrect. He also contends that the Tarot may be traced back to the religious symbolism of the ancient Egyptians, when in fact it was the product of the Rosicrucians of the 18th century who drew upon the Jewish mysticism of the Qabbalah for its symbolism, not the ancient Egyptian Wisdom teachings. But these shortcomings in no way spoil what is one of the most comprehensive surveys of the ancient Wisdom and occult sciences

ever compiled, and that is the reason we recommend Manly P Hall's book to our readers.

IMPORTANT NOTE! There are now several editions of this book available including various 'print-on-demand' and Kindle versions which are badly typeset and omit many or all of the illustrations of the original. The most complete edition is the hardcover "University Edition" published by the Philosophical Research Society (PRS) in 2008, but at \$225 this is very expensive. The "Reduced Size Paperback" published in 1978 and reprinted in 1988 and 2000 by the PRS, costs \$75. This includes 54 symbolic colour plates, foldouts and an overlay as well as 200 black and white illustrations, an extensive bibliography and complete index. ISBN 10: 0-89314-830-X. There is also a hardcover edition of this book, price \$95 from PRS. ISBN-10: 0-89314-548-3 and a paperback compact "Reader's Edition" with 100 black and white illustrations and a 16-page colour insert, price \$26 from PRS. ISBN-10: 1585422509. Finally, there is the illustrated paperback reprint mentioned above, published by TarcherPerigee in 2003. This contains most, but not all of the illustrations included in the original edition of 1928 but omitted from many of the subsequent reprints.

In Tune with the Infinite—by Ralph Waldo Trine
Wilder Publications 2008. ISBN 978-1604590388. Softcover, 128pp.

in tune with the infinite

Ralph Waldo Trine presents the eternal Spiritual and material truths of Life in a clear and simple manner which all can understand. It requires no great intellect or education to apply the very simple laws which he so beautifully reveals in this inspired book. In the degree that you do so you will change sadness into joy, failure into success and weakness into strength.

Although claimed by many as a pioneer of 'New Age' teaching, there is nothing in Trine's message that was not known and taught thousands of years ago. We hear the same truths from the immortal lips of inspired teachers like Jesus, Buddha and Krishna. Trine's great accomplishment was to re-state these truths in simple words that even a child can understand and to make them accessible to millions. This is no accident; for the truth is always simple if we are simple enough to recognise it when it is presented to us. Sadly, so many seekers desire mystery, glamour and complexity. Such will turn away from the simplicity of this book. But the simple in mind and heart will recognise the Truth within its luminous pages.

It will remind them in no uncertain manner that the keys to health, happiness and success are to be found within and not without. As the Author says in his Prelude: "THE

optimist is right. The pessimist is right. The one differs from the other as the light from the dark. Yet both are right. Each is right from their own particular point of view, and this point of view is the determining factor in the life of each. It determines as to whether it is a life of power or of impotence...of success or of failure."

How true these words are! Do we not all know seekers whose 'glass is always half-empty'?—who fear the worst and anticipate disaster and disappointment at every turn? And is it not also true that such people often live lives of sorrow, confusion, ill-health and failure? But it needn't be like this. In US lies the power to change our own individual lives for the better. And in the degree that we do so we shall change the lives of others around us and the world in general. This is the simple way to bring peace and light into this sorely-troubled world. It needs no 'occult powers' nor special training to do so. All it requires is an understanding of the TRUE LAWS of Life and a willingness to put them into practise in our daily lives. This is the SIMPLE message which Ralph Waldo Trine gave to the world over 100 years ago.

You can find a series of short extracts from In Tune with the Infinite in the afterword to our article on the law of attraction.

The Upanishads—translations from the Sanskrit by Juan Mascaro
Penguin books 1965. Reprinted by Penguin Classics 2005.
ISBN 978-0140441635. Softcover, 144pp. Price new £7.85.
Also available second-hand from as little as £1.00.

Read an abstract adapted from the Introduction to the book

upanishads

The Upanishads have rightly been described as the 'Himalayas of the Soul' and we regard this selection from them by Juan Mascaro as the finest and most accurate translations ever rendered into English. Readers who are unfamiliar with these sublime spiritual treatises on Man, God and the Universe are advised to read our abstract adapted from the translator's introduction to the book.

Born in Majorca of Spanish parents in 1897, Juan Mascaro's own search for Truth began at the tender age of 13 when he studied a book on occultism. This led to his discovery of an inferior English translation of the Bhagavad Gita which inspired him to learn Sanskrit by himself. He went on to study and teach at Cambridge University, in England, where he lectured on the spiritual values in the Bible and Spanish mysticism. He died in Cambridge in 1987 at the ripe old age of 90, having left the world some of the finest translations of the sacred texts of Hinduism ever written.

Rabindranath Tagore, the famous Bengali poet wrote in a letter to Mascaro that he had "caught from those great words the inner voice that goes beyond the boundaries of words." We agree and do not doubt that Mascaro's early occult studies greatly helped

him to imbue his masterly translation with the fire of true inspiration which shines from every page of this book. For this is an occult book in the best and highest sense of that much misunderstood word, which contains some of the most elevated spiritual truths ever composed by the hand of man.

These timeless treatises upon Truth are as far removed from the dry and dusty curiosities of religious scholarship as the Sun is removed from a guttering candle in a dark cellar filled with bemused bats. H. P. Blavatsky tells us that upa-ni-shad is a compound word meaning "the conquest of ignorance by the revelation of secret, spiritual knowledge." Mascaró confirms this in his introduction where he says that Upanishad means to "sit at the feet of the Master", which means the same and is the same, for one cannot learn the true occult sciences without a spiritual Master as we point out in many of our articles. The Upanishads are to the Vedas what the Qabbalah is to the Jewish Bible. They treat of and expound the secret meaning of the Vedic texts and the occult sciences.

Every sincere seeker who truly longs to scale the mountain of Truth should read the Upanishads, for in few other sacred texts can we find such clear and simple instructions to guide the feet of the traveller on the path to the Light.

Serpent in the Sky—by John Anthony West

The high wisdom of Ancient Egypt

serpent in the sky

We first read John Anthony West's groundbreaking reinterpretation of the science and civilisation of Egypt more than 30 years ago and were deeply impressed by it. We remain impressed today, for what he has to say about the wisdom of ancient Egypt has rarely been expressed more clearly or completely by any other popular author. West challenged the prevailing dogmas about ancient Egypt for the very first time, providing a generation of readers with information which had either been suppressed, ignored or misinterpreted by orthodox archaeologists and Egyptologists.

The service West has rendered to scholars and ordinary readers alike cannot be underestimated. By summarising and extending the work of the philosopher and mathematician, R. A. Schwaller de Lubicz, he has not only made the ancient Egyptian sciences of art, architecture, mathematics, geometry and philosophy comprehensible to the lay reader who knows little or nothing about these subjects, but provided the serious occult student with a wealth of hitherto scarce and invaluable information on the hidden

wisdom of ancient Egypt.

While we would recommend Schwaller de Lubicz's own books to those who wish to delve more deeply into the sacred sciences of ancient Egypt, his magnum opus—*The Temple of Man*—runs to over 1,000 pages and is not cheap at nearly £170 for the hardcover edition published by Inner Traditions in 1998. For most readers, *Serpent in the Sky* covers the same ground as de Lubicz, and is considerably easier to read.

West is no New Age apologist promoting the weirder speculations of conspiracy theorists, but a conscientious and accomplished scholar who has the advantage over most orthodox Egyptologists in that he writes with great clarity, acuity and humour, dispelling the many popular misconceptions which surround the subject of ancient Egypt and its civilisation with rapier-like wit and inescapable logic. If you are fascinated by ancient Egypt (and we know few seekers after truth who are not) you will not be disappointed by this book.

NOTE: The paperback edition published in 1993 includes an update on the author's dating of the Sphinx.

Secrets of the Great Pyramid—by Peter Tompkins

secrets of the great pyramid

Although written over 40 years ago, this lavishly illustrated book remains the most comprehensive compendium of accurate facts and data about the Great Pyramid we know. As secondhand copies of the 1978 softcover edition (shown at right) are readily available in the UK and USA for less than £10 there has never been a better time to add this book to your occult library. Many contemporary writers about Egypt, such as Graham Hancock, John Anthony West (see previous review) and Robert Bauval, have drawn much of their material from the enormous amount of data Tompkins collected together for his book.

The book contains over 300 illustrations from sources ranging from the twenty-volume survey of Egypt commissioned by Napoleon to the first photographs taken inside the Pyramid in 1865; and an appendix by Professor Stecchini on the relations of ancient measures to the Great Pyramid. From the first Arabian investigations in the 8th century, to the latest theories and explanations, this book relates the complete history of the exploration of the Great Pyramid. Peter Tompkins recounts the explorations and adventures of the archaeologists, treasure-hunters, soldiers, scientists and eccentrics who have tunnelled into and studied the Pyramid over many centuries. He analyses the various theories as to how and why the Pyramid was built, and its relation to other monumental structures of antiquity, including Stonehenge and the ziggurats of Babylon.

Whilst we would not necessarily endorse all the author's conclusions about the purpose and function of the Great Pyramid, we know of no other book in which so many different theories have been presented in such a thoroughly sensible and scientific manner. This is in sharp contrast to many newer books on the subject, which, we are sorry to say, promote the most improbable fantasies based on variations of the same crackpot theories Tompkins demolishes in this book. Among these theories may be included the hair-brained notion that the Great Pyramid was a 'nuclear' power station, a prophetic device to predict the future or was built by aliens.

Several chapters in the book will be of great interest to occult students, not least those which explore the many astronomical, astrological and mystical aspects of this mysterious monument, whose primary purpose was a Temple of Initiation into the ancient Mysteries, as many of our readers will know. For these reasons alone we highly recommend this book.

egyptian magic

This rare book on the metaphysical doctrines, religion and magical practises of ancient Egypt was first published as volume VIII of *Collectanea Hermetica* (see *Numbers: Their Occult Power and Mystic Virtues*, reviewed below), in 1896. Although the book was written at a time when the science of Egyptology was in its infancy, this in no way negates the invaluable esoteric lore the author has collected from the translations of Egyptian papyri available to her in the 19th century, which remain as much of an enigma to modern scholars as they were to Egyptologists in Farr's time.

Understandably, she draws heavily on the books of E. A. Wallis Budge, now sadly out of favour among Egyptologists for reasons of political correctness rather than scholarship in which he vastly exceeded all his modern contemporaries put together. The book includes a detailed examination and discussion of reincarnation, initiation, evolution and the afterlife which is in complete accord with the true laws and principles of Occult Science as expounded in many of our articles.

Farr correctly deduced that the principles of Egyptian magic were based on an elaborate series of correspondences derived from the fact that material and spiritual evolution follow the same Hermetic law of 'As above; so below', and that matter and spirit are the opposite states of the one Universal Substance, or *Prima Materia*.

The book begins with a dissertation upon the seven principles of man as they were known in ancient Egypt, explaining how they enter into the body at birth, what happens

to them at death, and the manner in which they are connected. Later chapters include several so-called 'spells' taken from the Book of the Dead, which are nothing of the kind, for all these exhortations and prayers are nothing more nor less than allegorical representations of the various transformations the Higher Self undergoes during life and after death.

Over half the book is taken up with extracts from a Gnostic papyrus entitled The Book of Knowledge of the Invisible God, which forms part of the Bruce codex found in Upper Egypt in 1769, and now preserved in the Bodleian Library, in Oxford. This luminous text is reminiscent of the Pistis Sophia in parts and consists of some of the esoteric teachings Jesus imparted to his disciples after his resurrection. These alone make this little book well worth studying. You can read about the hidden meaning of the resurrection in our article about the esoteric meaning of Easter.

NOTE: Amazon sell a Kindle edition for just over £2.00 but not having seen it we cannot vouch for its quality or accuracy. Kessinger Publishing produced a reprinted edition in 1993, but this may contain errors and omissions. Hence, we recommend that those on a tight budget avail themselves of the free e-text published by the Hermetic Library (see above link).

numbers

We feel compelled to begin this review with an apology. Numerology cannot be picked up piecemeal in an idle hour or two. Nor can it be used to tell 'fortunes' as many people have been led to believe. If that is your desire, we suggest that you take up reading tea-leaves or the Tarot! As we point out in our article on symbolism, the students of Pythagoras spent seven years learning the basic principles of the sacred science of numbers, as you can read in our article on numerology. Consequently, Westcott's book, like our own article, should be regarded as an introduction to this vast and complex subject, not a complete course of instruction in the science of numbers, which cannot be condensed down into a slim volume of just 120 pages.

The book was first published in 1890 as volume IX of Collectanea Hermetica, a series of 9 books on the occult sciences issued under the imprimatur of the Theosophical Society with Westcott as editor. Westcott expanded and revised the book in 1902 and 1911. A 4th edition was published in 1974, which is the edition shown at right that we have used for this review. Those who judiciously study this book will gain a first-rate understanding of the main principles of the hidden properties and meaning of numbers.

Westcott drew on an immense number of ancient Greek, Roman, Chaldean, Hebraic, Egyptian, Chinese and Sanskrit sources for this book, as well as the writings of Eliphas Levi, the Egyptologist E.A. Wallis Budge, Thomas Taylor, Godfrey Higgins, Michael Maier, Gerald Massey and H. P. Blavatsky. But Westcott's main source, and the reason that this book is of such value to the serious occult student, are the teachings of Pythagoras himself, which the author has collected together from the fragmentary remains of the writings of the Sage's pupils.

The science of numbers is one of the most important keys that unlocks the secrets of man and the universe. As H. P. Blavatsky said so truly: "Everything in the Universe was framed according to the eternal proportions and combinations of numbers—God geometrisises—and numbers and numerals are the fundamental basis of all systems of mysticism, philosophy, and religion." Pythagoras stated that the Monad or unity, emanated the Dyad, and thus formed the spiritual trinity, from which is derived the quaternary, or the mystic four, the number of the material world. These numbers comprise the totality of the forces of Nature and the principles of man, both of which are seven in number.

IMPORTANT NOTE! There are several print-on-demand and Kindle editions of this book available from Amazon and other booksellers. These are best avoided as almost all are badly typeset and contain innumerable errors and omissions. If you want a printed copy our advice is to obtain the 4th edition shown above, published by the Theosophical Publishing House in 1973. Otherwise, read the free e-text at the Sacred Text Archive.

qabbalah by isaac myer

The Qabbalah (also written "Kabbalah", "Cabala", etc), which word means "doctrines received by tradition"—is a system of Jewish theosophy that played an important part in the establishment of the Christian Church. As such, it is a valuable work for the study of the origin of religions and their philosophy in general, and the origin of the formulations, dogmas and doctrines of early Christianity in particular. We would add that Isaac Meyer's book has nothing whatsoever to do with the fashionable craze of 'kabbalah' popularised by various Hollywood celebrities in recent years!

First published at the author's own expense in 1888, Meyer's Qabbalah remains the most accessible and readable summary of these important Hebrew writings that we know of. The book includes a short account of the life and writings of the philosopher, Solomon ben Yehudah Ibn Gebirol or Avicbron; some parts of the Qabbalistic philosophy, quotations from the Zoharic books, explanations of many New Testament passages, the basic element in Religions, and extracts from the so-called "Pagan" writers on the Invisible and Visible and the Ideal and Real. In addition, the book contains Qabbalistic accounts of the Creation which should be of interest to every seeker, for it is only by carefully comparing the various accounts to be found in the sacred books of all times that the diligent occult student may arrive at a true conception of the origins of Man and the Universe. The book also contains important discussions upon the nature of illusion, sound, colour and rhythm, and an interesting article on an Ancient Lodge of Initiates.

For those interested in making a deeper study of Jewish Mysticism it is important to get as close as possible to the original sources upon which the early philosophers erected the doctrine and teaching of the Kabbalah. For this reason we also recommend two further classic books on this system of Jewish theosophy. These are: *The Kabbalah: its Doctrines, Development, and Literature* by Christian David Ginsburg, published by G Routledge & Sons, London, 1920 and *The Kabbalah or the Religious Philosophy of the Hebrews* by Adolphe Franck (translated by I. Sossnitz) 1926. This latter book is available to read online in HTML format at the Internet Sacred Text Archive. We review this superb compendium of sacred and occult texts on our Links page.

NOTE. We recommend the edition published by Weiser Books in 1970/72 (ISBN 0-87728-008-8), OR the photographic reprint by Elibron Classics published by Adamant Media Corporation in 2001 (ISBN 978-1402185038). We do not recommend the Kindle and other electronic editions sold by Amazon as these often suffer from defects and imperfections that make such ebooks virtually unreadable.

The Occult and the Curative Powers of Precious Stones

—by William T. Fernie M.D.

occult curative powers precious stones

Although it was first published more than 100 years ago, W. T. Fernie's seminal source book on the various occult, alchemical, historical, mythological and magical lore and properties associated with precious stones and minerals has never been equalled. The book is a virtual encyclopedia of invaluable information about stones and metals, and copiously enlivened with anecdotes and historical information on how precious and semi-precious stones and metals were used in the past.

Given the present-day fascination with "crystals" and the very many uses (and we may say many more "abuses") to which they are now put, the serious student of occultism will find this book indispensable in his researches into the historical and occult lore of gems of all kinds. Having said that, the book is not without errors and should not be taken as an infallible guide to the use of precious stones for occult purposes. The real occult facts about precious stones and their employment have and always will remain a closely-guarded secret for the reasons we give in our Occult FAQ.

NOTE. The edition illustrated above is the HarperCollins paperback reprint of 1981. So far as we have been able to ascertain this is verbatim with the original edition of 1907. When we last updated this page in late November 2024, used copies of the HarperCollins reprint were readily available from Abe Books and other booksellers from £25.00 or less. The various print-on-demand editions of this book now being produced are best avoided for the reasons given in our note 'Where and how to buy occult books' in the sidebar.

OCCULT BOOKS

"Of the making of many books there is no end."

Ecclesiastes 12:12

This reminds us of a very good friend of ours, a Mystic and Seer of wide experience and great wisdom, who, when he was asked which of the many thousands of rare occult books in his library he would recommend, he said "None of 'em!!"

We agree with him. The fact of the matter is that with very few exceptions, the books which are recommended to Occult students are often chaotic in their contents and contradict one another. The problem is that it is impossible to put the most profound spiritual and mystical experiences into words that cannot be misunderstood by a large number of seekers.

We only have to consider the many different interpretations of the Bible and other Sacred books to know that this is true. We could easily have reviewed 500 occult books, or 5000, but whether acquiring that many books leads to knowledge and understanding or confusion and mental indigestion, is a question we leave our readers to ponder. . .

Moreover, in all our wide experience of occult and mystical literature, we know of no books that do not contain some errors, while in most truth and error are so inextricably intertwined that only a trained Occultist can sift the one from the other. Yet some truth is better than none. This is especially true of the thousands of new occult books that are now appearing, very few which of contain anything that has not been said better before. This answers the question we have often been asked as to why so many of the books we do review were published in the last century or even earlier.

It is for this reason that we have chosen only those books which contain real occult wisdom and truth which stand out like beacons of Light amongst a sea of mediocrity, plagiarism and fantasy. Books that explain who and what Man truly IS, whence he comes, whither he is going and the purpose and meaning of life. In connection with this, an anonymous alchemist has written:

"Let a Lover of truth suspect things that are quickly understood; for truth lies hid in obscurity; for Philosophers never write more deceitfully—than when plainly, nor ever more truly—than when obscurely."

This is true, though it may come as a shock to those who imagine there is a secret 'Da Vinci' code which at a stroke will magically 'unlock' the obscure allegories, arcane symbolism and archaic language used by occultists, mystics and philosophers. We're afraid that no such 'code' exists, has existed, or ever will exist, except in the minds of novelists and conspiracy theorists. It requires wide reading, long study, intuition and sheer hard work to discover the hidden meaning in the best occult books as we explain in our occult studies course.

Occult books for beginners

We are often asked to suggest the 'best' occult books for beginners. Our invariable answer is that the 'best' books are those that teach us the most. For this reason we suggest that if you know little or nothing about the occult sciences, you start off by reading the following three articles we have published:

Occult FAQ

Why study Occult Science?

There is only One LIGHT

Then, if you wish to learn more, *The Secret Teachings of All Ages* is a readable and comprehensive introduction to the occult sciences for those who know little or nothing about them. Those who prefer to read the personal experiences of seekers, should enjoy *Serpents of Wisdom* or *The White Brother*. Both these books were written by authors who drew on their own personal experience to describe the search for a genuine spiritual teacher and answer the many questions asked by beginners. These two books are reviewed on this website and can be downloaded in PDF format.

In addition, we would also recommend *In Tune with the Infinite* by Ralph Waldo Trine. Although not an 'occult' book in the strict sense, it presents the Eternal Truths of life with great clarity and simplicity—and just as importantly—how to apply them to improve your life, health, wealth and happiness.

astral conversations

Finally, we strongly recommend that you read and study *Astral Conversations*—a series of articles in which two typical occult students—one a mere beginner—discuss many different subjects and provide plain, no-nonsense answers to them. A hardcover print edition of these twelve conversations was published by Aula Lucis in 2022. This is arranged slightly differently to the website articles but the content is the same. For further information about this printed edition see our review of the book on this page.

Serpents of Wisdom

An extract adapted from the book by Edda Livingston reviewed on this page
You have probably come to the realization that there are no listings of Masters and true Teachers in the Yellow Pages. It is possible to find psychics, astrologers, and other such flora and fauna, and you may even find advertisements in metaphysical-type magazines for birds of ill-omen who call themselves masters, but unless we have polyps for brains, we ought to know that the only thing they are masters of, is deceit of an expensive kind.

The ill-advised followers of these self-appointed teachers, swallow wholesale the most absurd propositions put forward by these coolies of the Occult; these poachers on Spiritual grounds. But is there a single Master among them? An Adept, perhaps? Or an Initiate? The sad but true answer is NO—not one. There is not even a good imitation of one.

So where will you find one?

Do you think you would recognize a Master if you did meet one? Are you under the impression that he would advertise his Mastership by wearing saffron robes? Flowing locks? Sandals? A halo? A crown of thorns? Or could it possibly be that he is so well hidden because he looks like any one of us, giving us no obvious signs to recognize him by, and, in this manner, throwing us back on our ability to tell Truth from falsehood? How many of us are willing or able to know and welcome Mastership or Adeptship by listening to words of Truth? The majority seem to prefer personality, fame, and drivellers of ineptitude who reconfirms our preconceived opinions.

And anyway, to the ordinary man, all that stuff about Masters, Wisdom, Light and Love, has no meaning—it makes him yawn. What matters to him is profit, the latest football scores, fun, food, and lots of sleep. If you talk to this kind of plebeian about the more elevated things—things of the Spirit and of the Higher man, he will probably brush you aside with: 'In my opinion, that's a lot of bull.' and it will be your own fault for thoughtlessly throwing your pearls before the swine. Your hard gained pearls of wisdom

will be trampled underfoot, and neither you nor the plebeian you sought to enlighten will have gained a thing by your eagerness to share your new-found Light. Regretfully, you will soon learn that most men shun the light like so many vampires hiding in their coffins as soon as the sun comes out.

The 19th Century occultist, Eliphas Levi said that: "Fools are the people who kill men of genius", and we might add that they are also fond of killing the Messengers sent to us from God. We all know what crass humanity did to Jesus. Apollonius of Tyana was thrown into prison and later tortured to death; Daniel was thrown to the lions; Raymund Lully was stoned to death; Joan of Arc was burnt at the stake; Ibn Gebirol, the Kabbalist, was murdered; Jaques Cazotte, the seer, was executed, and Socrates was condemned to death. Pythagoras had to flee from the tyranny of Polycrates. Cagliostro died while confined in prison; Giordano Bruno was burnt alive; Sendivogius was imprisoned and tortured; Paracelsus and Agrippa were forced to spend their lives as wretched wanderers. . . and the list goes on.

You may argue that all this took place a long time ago, that we are more civilized these days and would never tolerate such barbaric behaviour. Don't believe it! Human nature does not change much, and however arrogant and self-satisfied modern man is concerning his latest achievements and so-called progress, he is still as stupid and as cruel as ever. Fools are still persecuting and killing messengers, whether physically or by ridicule and calumny, who irritate them, or who hold views considered threatening.

This is one of the reasons why the Wise keep silent as to who, what and where they are—and maybe—to a lesser extent, so should you. It is also wrong to foist your beliefs on others who may be at a different stage on the Path than yourself; or who may simply be going by a different route. Since it is only possible for us to understand something up to our own level, how would we know if we were foisting ourselves and our beliefs on those who have far surpassed us in knowledge and Wisdom? And yet, people do all the time, unaware of the pitying and gentle smiles of those who can see through them.

And although you should always protect the fellow traveller lower than yourself on the ladder to the Light, you must at all times guard against being preached at or dictated to by them. As for the majority, those who care not, let them go on their merry way, without judging them, but at the same time make sure that you see them for what they are, freeing you from the danger of falling for outward trappings.

But if the opportunity to plant a seed in their barren soils presents itself, you should do so. A good seed may lay dormant until the experiences of their lives has watered their soil with tears and enriched it with the ashes of their dreams, sprouting into a beautiful flower of wisdom, years—or lifetimes hence.

It is possible that you yourself are on the Path because someone, at some time, planted a seed in you. A kind soul did the work of the Master on your behalf and you are now reaping the benefits of that kindly act. This is the Way of Service and it is the only Path you can take if you want to reach one of the Masters.

There are no short-cuts to be had on the Path to the Light. We all have to travel the same road and overcome the same obstacles in order to obtain our Goal, and only the strong and steadfast, the loving and faithful, will be crowned with success. Let us at all times remember that even the Masters had to travel along this Path in times gone by, and for this reason they understand fully our aching hearts and our yearnings, but they also know that the Reward is well worth striving for. They know that it is necessary for man to live through material darkness, for we can only be born into the Light from this darkness. But before we start longing for this Birth, we must reach a point where we feel the limitations and the powerlessness of the darkness. We must long, with our whole hearts and minds, to live within the rays of the Light, and we must fearlessly face the Truth. If the Truth hurts, we must have the ability to look within ourselves for the fault, rather than change the Truth in order to spare ourselves.

Then, and only then, can we hope to be noticed by the Masters who live within the Light.

Upanishads

An abstract adapted from Juan Mascaro's introduction to his translations of the Upanishads (see book review at left)

If all the known Upanishads were collected into one volume, they would make an anthology about the length of the Bible. The spirit of the Upanishads can be compared with that of the New Testament summed up in the words 'I and my Father are one' and 'The kingdom of God is within you', the seed of which is found in the words of the Psalms 'I have said: Ye are gods; and all of you are the children of the most High'.

The central message of the Upanishads is that God must not be sought as something far away, abstract, and separate from us, but rather within us in the Higher Self which transcends the limitations and littleness of our earthly personality. In rising to the best in us we rise to the Higher Self in us and to God Himself. Thus when the sage of the Upanishads is pressed for a definition of God, he remains silent, meaning that God is silence. When asked again to express God in words, he says: 'Neti, neti', 'Not this, not this'; but when pressed for a positive explanation he utters the sublimely simple words: 'TAT TVAM ASI', 'Thou art That'.

According to the Upanishads, the reality of God can only be apprehended in a consciousness of joy that is beyond ordinary consciousness. The silent voice of the Eternal is perpetually whispering in us his melodies everlasting. The radiance of the Infinite is everywhere, but our ears cannot hear and our eyes cannot see: the Eternal cannot be grasped by the transient physical senses or the transient material mind. This is beautifully expressed in the Taittiriya Upanishad: 'Words and mind go to him, but reach him not and return. But he who knows the joy of Brahman fears no more.'

Brahman is described as immanent and transcendent, within all and outside all. If the All is imagined as a triangle, the apex might be imagined as God transcendent, who in his

expansion creates matter out of Himself—not out of nothing as science believes—and thus becomes immanent until the end of evolution when the immanent has once again become transcendent in the ascension of evolution towards Him. Why? For the joy of creation. Why is there evil? For the joy of good arising from it. Why suffering? For the instruction of the Higher and lower self. Why darkness? That the Light may shine the more brightly and gloriously. This teaching is as old as man and the very essence of true Occult Science.

The Upanishads introduce the reader to the conception of a fourth state of consciousness, above waking, dreaming and deep sleep. The law of attunement, wrongly called Karma—which we discuss in our study course—explains the apparent injustice in the world with sublime simplicity. We alone are the builders of our own destiny, and the results are not limited to one life, since our Higher Self that was never born and will never die must come again and take to itself a fresh body, that both selves may have the reward of their works. Good shall lead to good, and evil to evil. From good, joy shall come, and from evil shall come suffering. And thus the grand scheme of evolution flows on towards perfection.

And when all the transient has been left behind, when final liberation has been attained, when our little self is lost in the greater Self in us and in the ALL, as a drop of water is lost in the sea, does it mean that all consciousness is lost? After the death of the lower self, when the small drop of human consciousness has become one with the vast ocean of Consciousness, does it mean that our individual consciousness is lost? Yes, say some spiritual teachers, both past and present but they err and err profoundly as you can read in our astral conversation on consciousness after death. The truth, as you may read in that article, is that the Higher Self gathers the spiritual qualities of every terrestrial personality into which it incarnates and adds them to its own eternal consciousness.

The Higher Self has then become the Self supreme and not only has it full consciousness of its own experience through its many incarnations, but access to the consciousness of all other selves too. How could the union with God be unconsciousness, unless God Himself was unconsciousness? We all know that caterpillars die in order to transform themselves into beautiful butterflies. Free from its limitations, the little self forgets its limited life in the boundless ocean of life. It is not a death, but a victory over death, a rising and a resurrection to greater and more vivid life.

This is the central message of the Upanishads and why we commend the book to you for serious study and meditation.

NOTE: Juan Mascaro translated portions of several other Indian sacred texts during his lifetime. Foremost among them are the Bhagavad Gita (1962) and the Dhammapada (1973). Both are well worth reading.

Where and how to buy occult books

The occult books we have reviewed have been carefully selected as the best of their kind. We could easily have included many more books which are both scarce and expensive, but being aware of the fact that most sincere seekers have limited means we have favoured those that are free to read online, and/or are readily available in several editions and formats, both new and second-hand, at modest cost.

BUYERS BEWARE!

And now we must issue a strong warning. Whilst Information Technology and the Internet have vastly increased the availability of rare and/or out-of-print books, it has also made buying definitive editions very much harder.

Such books are increasingly being digitally-scanned and published as print-on-demand or e-books. Whilst some are well-reproduced, accurate facsimiles of the original editions, the majority are not. Many are incomplete and contain serious errors and omissions, and in the worst cases, may be completely unreadable.

Notwithstanding these grave shortcomings, such reprints are often prohibitively expensive, so adding insult to injury whilst providing a jolly good income for the publisher! The latter is usually a 'one-man-band' whose sole interest is in making a fast buck from the unsuspecting.

The only way to be sure you are not paying good money for waste paper is to buy the specific edition we recommend, or if that is not possible, contact the publisher or seller to make sure that the book they are selling is an exact facsimile of the original with no errors or omissions.

We have indicated below where to obtain the occult books we have reviewed, but this information is subject to change as titles go in and out of print and/or stock and web links are updated. In most cases a web search will return results from various sellers, and it is also worthwhile contacting booksellers directly.

Don't rely on booksellers' online lists of titles in stock as these are often out-of-date. Do try charity shops, as these often stock rare or unusual books at bargain prices. You will find a short list of booksellers specialising in occult books in the UK and some in the USA below.

Occult booksellers and publishers

Whilst we try to keep this list up-to-date, these websites may become unavailable at any time

Abe books is a major seller of second-hand books but delivery can be slow and customer service rather poor.

Atlantis Bookshop is London's oldest independent occult bookseller established in 1922. Unfortunately, they now seem to focus mainly on books about black magic and witchcraft, do not list their current stock, and provide no search facilities.

Magis Books—mail-order bookseller based in Leicestershire, in the UK. Although their website is awkward and frustrating to use, it does list their current stock and provides a

search facility by title, author and category.

Treadwell's Books located in Bloomsbury, in London, sells books on occultism, mythology, folklore and religion. Like the Atlantis Bookshop, Treadwell's favour books on witchcraft and black magic rather than the Ancient Wisdom and Occult Truth.

Courtyard Books based in Glastonbury, sells esoteric and occult books including fine, limited edition titles in hardcover from small publishers and private presses. Their website is easy to use with a good search facility.

Watkins Books—esoteric bookshop in London, established over 100 years ago. Watkins have an extensive list of books on philosophy, metaphysics, mythology, the occult sciences, astrology, magic and mysticism, both new and second-hand, including rare and out-of-print classics.

Wizards Bookshelf—mail-order publisher and bookseller based in Michigan, USA, publishes high quality reprints of many scarce metaphysical classics, such as The Divine Pyramider of Hermes Trismegistus, Anna Kingsford and Edward Maitland's translation of The Virgin of the World, On the Mysteries of the Egyptians, Chaldeans and Assyrians by Iamblichus, and many of the books referred to by H. P. Blavatsky in her master-work, The Secret Doctrine.

I got this last week and started chipping away slowly at all the content. It's amazing.

It took awhile for me to download the whole thing since there weren't many seeders, or maybe my ISP didn't want me looking at such powerful documents. ;)

I urge you not to violate the intellectual property of others, especially occult authors. I learned the hard way on this one. Please don't make the same mistake I did and think its ok to make a copy of someone elses IP.

-2

[deleted]

•

13y ago

Hmm. How exactly did you learn? You can't just drop something like that and then not elaborate :P

6

[deleted]

•

13y ago

I have it on good source that some authors use Enochian angels. That shit is even worse than the MPAA ;)

Seriously, I have it too. It's awesome. Please seed. And please BUY SOME BOOKS from the author you like, writing occult book is a business in which you hardly break even, so support the authors you like.

Edit: See Robert A Wilson for example? A superstar if there was one. Does anyone remember his death? Guy had to sell his Thoth cards one by one to raise a bit of money for his medical expense. When word got out, everyone sent him 23\$ so he could die at home with his family.

Tear jerking story, yes. But not everyone is Bob Wilson.

so you can piece them out one by one which would be a decent amount of work but will net you the best profit. or you can try to sell them in a lot, which means you may miss out on a really great find, but you don't have to put very much work into selling them.

Dude, how does someone do this. I would love to have a collection of antique esoteric and occult books. But how the fuck do you start. What are the resources? I'm not johnny depp from the ninth gate, I'm not in the bibliophile world. But I can definitely be thoroughly unscrupulous.

Antique shops are usually a good bet.

EBay, other online book stores.

There's a lot out there - it's just a case of digging sometimes to find the right stuff 😊

I run a bookstore that deals in a lot of esoteric books. eBay is your best bet if you're looking to sell them quick. eBay sold listings are your friend for valuation. Blavatsky and Crowley are always good sellers. A shortcut for identifying which books are worth looking up is going to be identifying publishers and key words that indicate more valuable books- that will save you a lot of time.

Shakti, and the joy of our natural state
Hello all,

I'm relatively new to Singer's teachings, but after coming from a few years of studying and following Eckhart Tolle's teachings quite a bit, I came across Mickey and felt he was a great compliment to Tolle's stuff. I've read Untethered Soul, and have binged nearly all of his podcasts - almost current! This stuff seems great, and quite a practical approach to applying deep teachings to daily life.

My question for discussion is along the lines of Shakti. I love this term, and the analogies to a stream of Shakti energy being blocked with our stuff, that, if removed, it can flow freely and lift us up. However, I don't feel like I've had the direct experience yet, so was hoping from some insight or discussion from the community.

Through both Tolle and Singer, when in meditation, I can get to a state of stillness and peace, and it's a practice. But I haven't experienced the intense joy/love/ecstasy, or Shakti, flowing through me like Singer often talks about. Has anyone here gone that far?

As always, I would love advice or insight, and any further practice suggestions, meditations or otherwise!

Thank you.

One piece of advice I might give is to not focus so much on the extremes of bliss that we hear about. Instead, see if you can just start to notice a feeling of well-being in your body and mind. E.g. notice that it feels good when you relax and release. That is the trickle of bliss that one day may become a torrent. If you keep looking for fireworks, you're going to miss the bliss that is there. Remember, what you focus on grows stronger.

Needed to hear this. What we focus our consciousness on ultimately becomes our reality.

I would say that chances are you have actually felt this sometime in your life but just didn't recognize it as Shakti. Recall a time in your life, even if only for a few moments - minutes or hours, where you felt almost overwhelmed with love or joy or fulfillment.

7

Amazing_Accident1985

•

I infrequently have brief moments of a warm fuzzy feeling starting in my core and it radiates outwards to giving me goosebumps. I relate this to an outpouring of love from my heart. This is only as of the last year when the teachings/book actually hit home for me. Before that time I can't remember the last time I had felt the feeling I'm describing. This, for me, I believe is a small sample of my inner Shakti flowing up and out. It's hard to recall but I relate these episodes to when I come to brief realizations of how much I'm loved by my immediate family (wife and 2 young kids) or how fortunate I am to be in my position as a human being. It has occurred during meditation, driving my car and a couple other random times while not doing anything specific to evoke it. It really is a beautiful thing and very spiritual.

Good luck on your journey.

How strong it is can vary. I have experienced it, but haven't been able to maintain it. In some cases it felt more blissful whereas in other times, it felt more energetic but less of the bliss aspect. 😬 I'm currently working on cultivating this experience more.

3

ShrimpYolandi

OP

-

Can I ask what you do to cultivate it? The general teachings of just letting go I'm sure, but I guess I'm curious if you find any meditation practices that you like this singer might not teach as well.

I go see Mickey regularly since I am nearby. He often talks about letting go of our preferences and various forms of conditioning. In my case, I am doing a lot of therapy and going to a support group where we focus on recognizing and then letting go of past trauma. I'm doing a lot of reparenting and inner child work. I also do a lot of spiritual baths and listen to Mickey's talks online.

I had an experience about 2 months ago in meditation (I don't usually meditate, but I felt like it that day after yoga) that I typed into Chat GPT and it essentially said it was the kundalini energy being awakened, the Shakti thing he talks about. It was remarkable, and has removed all skepticism for me. I had a decade of yoga (mainly just asanas) under my belt and was still skeptical and didn't really understand things like chakras, but now I completely understand what they mean. For a couple of days after that I felt the energy occasionally pop up. I actually emailed Michael Singer's receptionist about it because I didn't know what to do and was a little bit afraid (from what I hear of kundalini stuff it can change a lot drastically) and they said just to continue with the practice of relaxing/releasing and that drastic changes won't happen, that any energetic changes would be gentle (which is what I want), they discouraged trying to reach any states or return back to it... and I agree, I think we miss the point when we focus on the outcome and it detracts us from the practice. I read this book back in 2017, but didn't earnestly practice releasing feelings until 6 months ago. The motivation to practice came from feeling fed up with my own BS. I realised that I feel my emotions anyway and at least this way it would make me a little bit more free each time. It's such a worthwhile practice, it has changed my life. I used to identify heavily with being an anxious person, and now I don't feel any anxiety at all. Only in small moments where maybe something warranted the stress, but then it goes away. All the best on your journey! It's worth it

From what I can see it could be a variant of thaumaturgy which mean making miracles, maybe the Boiling Isles equivalent is darker compared to what you expect from miracle magic.

Theurgy and thaumaturgy are related, but theurgy relates to magic related to divine powers, whereas thaumaturgy relates to occult. Since the titans are the closest things to gods in this world (archivists notwithstanding), I'd venture a guess to say that titan-based glyph magic/demon magic would be theurgy, whereas thaumaturgy would be...well, a bile sac isn't exactly occult. Buuuuuut that's just a human word, maybe it is just literally the other kind of magic? Demon magic vs witch magic. Maybe just a typo, but my theory is that it might be a theory class about combining both types of magic, which would really be the most wild of wild magic.

Is summoning the Ars Goetia difficult?

I've been interested for awhile now in summoning the Goetia Demons, specifically Stolas. There's mixed reviews from what I've seen so my question is,

Is it really as simple as drawing his sigil with white chalk and invoking his name or is there more to it?

I don't do Goetia stuff specifically, but speaking in general this isn't exactly how it works. Person A may struggle to practice with an entity that Person B very easily has powerful experiences with, and Person B may struggle with a different entity that Person A contacts easily. Then Person C may not be able to contact either of those entities at all, but they can practice just fine with something else.

So the question really becomes "is summoning the Goetia difficult for me?" and that's not something anyone can answer. All you can do is try it, and change up your methods a few times if the first time doesn't cut it but you're still interested. Good luck; I wish you the best.

Not specifically difficult, but needing real focus, background and certain implements, to be of any real use.

There are a lot of "lazy" techniques, that really don't work.

Read the sourcebook, "Lesser Key of Solomon," for the real experience. Been using it for decades.

I recently read Modern Demonolatry and it specifically focuses on stripping away the "bells and whistles" from the original grimoirs and only doing what is strictly necessary for success.

I won't bore you with technicalities, but suffice to say that the most powerful and essential instrument is YOU. Rituals are meant to help channel your abilities. But if you haven't actually practiced or developed any, then following everything to a T and having your chalice be pure gold with all the names engraved by a pure maiden won't do jack shit.

Very experienced practitioners can do itemless, wordless evocations.

If you want examples of what "preparation" means:

-tuning in to the sigil. Days, weeks, or even months ahead you should start drawing the sigil and meditating on it. Learn every curve. Place it in all sorts of places. Be able to quickly and accurately draw. Be able to close your eyes and fully visualise it.

-performing the chod rite.

-studying correspondances and offering the entity appropriate things

You can't summon the ars goetia unless you order it from amazon. But you can summon goetic spirits (or demons if you prefer) featured in the ars goetia. /s

but to answer you seriously, I personally don't use any fancy summoning ritual for my patron. I just call out to her when in front of my altar or meditating...or whenever i feel the need.

But you might find more info on r/DemonolatryPractices

Of course, it's not just I drew it and that's it. It depends on your energy. If your energies are aligned, it becomes easier for the entity to come. If you are strong, it becomes easier. Or if it wants to come, it becomes easier.

And, at least in the beginning, I suggest you evoke it, unless you are a Satanist.

... If you read the Grimoires, it's not supposed to be easy - at all. So, the Ars Goetia is a piece of a branch of magic called Solomonic Magic, the most ritually intensive branch of magick I know, personally.

That said, as a Chaos Witch myself, it doesn't HAVE to be hard. It's just not guaranteed to work at all if you don't do ALL the stuff involved. Very much like torrenting cracked software. You can TECHNICALLY download an illegal copy of Photoshop, and it is always morally ethical to do so imo, but if you torrent Photoshop the chance of giving your computer aids is very likely.

Therefore, you CAN free wheel summoning Goetic demons. You CAN get free stuff by dialing up President Volac without protection or whatever or a robe at Midnight, but the

chance of Volac using the fact that you're spiritually waving your bare ass at him to kick your ass for waking him up while he's mid coitous is entirely on you.

Goetic spirits are basically demonic people, OP. From personal experience, any of the goetic spirits can definitely tell you to go fuck yourself. Source? Gremorry told me to fuck off and never summon her again - ever.

On the flip side, Duchess Bune and not goetic but on a similar side, Dark Mother Lilith, love me. My goth dommy mommy demons are bad ass girl bosses, but again, YMMV. Be careful. _^

Has anyone here read stuff from Manly P. Hall?

What books would you recommend of his and what have you learnt from him? I have his Pineal Gland book and found that super fascinating. I know Secret Teachings is meant to be his magnum opus, so I might get that, but not sure about some of his other books. Which ones are worth reading?

Manly P. Hall's works are all worth reading and he has some truly beautiful gems of truth in his works yet quite ironically he has a rather strained relationship with truth especially in secret teachings of all ages. He fabricated some of it and came to regret it in his later years. Yet with all good lies there's a sprinkling of truth and his was quite profound

Absolutely read it but just keep in mind it is not 100% accurate

Whatever you do don't find a online site like library genesis, Z library or Annes Archive and search his name for access to all his published works. You'll be taking money from predatory publishing services like Amazon.

Oh I definitely won't do that.

Where are the other places I can get high quality books online for free? So I don't go there

If you know how to torrent, myanonamouse is the best for ebooks and audiobooks. There's a bit of rigamarole to sign up but it is worth it. If it isn't on Anna's Archive, it's probably on MAM.

Also, apps like elevenreader are free and can be used to turn any ebook into an audiobook.

Librivox is a good source of public domain audiobooks, of which a number of Manly P Hall's works are included.

Don't forget to check out Libby for free library sources (e and audio), they're great!

The one I recommend most is Self-Unfoldment through Disciplines of Realization, Hall's manual of meditation training. It's a really solid guide to spiritual development. Many of his pamphlets are little gems of occult instruction. Secret Teachings, by contrast, is a very early work -- I know it's popular, but to my mind it's far from his best.

"What the Ancient Wisdom Expects of its Disciples" is okay.

Overall he isn't a good writer and uses very little primary sources while often mostly going off of romantic conjecture while not offering much more than writers that have actually done esoteric work. You'll notice he fails to provide sources for pretty much anything he says. Most of his descriptions and knowledge of things are practically meme level. I would recommend looking elsewhere unless you are just reading for entertainment purposes.

And that's my problem with M.P. Hall, Blavatsky and theosophy as a whole. I, personally, see little distinction between them and Allan Kardec or Joseph Smith. There's an intrinsic esoteric/occult pool from which a general canvas is constructed but the means and whys of their work is very much a self developed interpretation of

conceptualized topics that don't necessarily connect with each other but are made to in some manner. The seriousness with which each of them presented their work and ideas was the way they found to validate their takes. I respect their trajectory and boldness in that period and time but I think they were "supplanted" by the esoteric works from the last half century.

Let me come at Manly Hall's works and influence from a bookseller's perspective.

Hall, over his 70 year career, published some 150 works. But the one that's most likely to be shelved in a bookstore is *The Secret Teachings of All Ages*. It's the book that made his reputation, and, by virtue of being in print since 1928 across a host of editions, sustains it still. Plus, it sells well enough to hold a space on bookstore shelves.

As a bookseller, it's a book that I point to as a pretty good general overview of a good deal of occulture known in history. That's right there on the bookshelf. Readers taking their first steps into occulture will know more about a bunch of topics than they did before reading this book. At \$20, the illustrated paperback is a good buy for what a reader gets.

But going ahead with investigating occulture, other books by Hall, as well as other books by a variety of other authors, might prove more useful or informative. Occulture is a big subject, after all.

Checking the publication background of *Secret Teachings* for this post, I discovered an interesting title in this category--*The Seeker's Guide to The Secret Teachings of All Ages: The Authorized Companion to Manly P. Hall's Esoteric Landmark* by Mitch Horowitz that came out in 2020.

There are plenty of his lectures available on Youtube which are very good. I used to listen to them while doing house hold chores. Just like anything though, you take what resonates with you.

Opinions on both this book and Manly P. Hall? It's so intriguing. This book called to me years ago and I've been finally going through it over the past few days and there's so much in here that once you read, you can never un-know.
